CONTENTS OF VOLUME 14

Special Invited Papers, Invited Papers, Articles and Short Communications

AKMAN, V. E. AND RAFTERY, A. E. Asymptotic inference for a change-point Poisson process 1583–1590

AKRITAS, MICHAEL G. Empirical processes associated with *V*-statistics and a class of estimators under random censoring 619–637

ALVO, MAYER AND FEIGIN, PAUL D. Intergroup diversity and concordance for ranking data: An approach via metrics for permutations 691–707

ANDERSON, BLAIR M., ANDERSON, T. W. AND OLKIN, INGRAM. Maximum likelihood estimators and likelihood ratio criteria in multivariate components of variance 405–417

ANDERSON, T. W., OLKIN, INGRAM AND ANDERSON, BLAIR M. Maximum likelihood estimators and likelihood ratio criteria in multivariate components of variance 405–417

ARRATIA, RICHARD, GORDON, LOUIS AND WATERMAN, MICHAEL. An extreme value theory for sequence matching 971–993

BAILEY, R. A. AND SPEED, T. P. Rectangular lattice designs: Efficiency factors and analysis 874–895

BAR-LEV, SHAUL K. AND ENIS, PETER. Reproducibility and natural exponential families with power variance functions 1507–1522

BARNDORFF-NIELSEN, O. E. Likelihood and observed geometries 856–873

BARRON, ANDREW R. Discussion 26–30

BARRY, DANIEL. Nonparametric Bayesian regression 934–953

BERAN, R. AND MILLAR, P. W. Confidence sets for a multivariate distribution 431–443

BERAN, RUDOLF. Discussion 1295–1298

BERAN, RUDOLF. Simulated power functions 151–173

BERGER, JAMES. Discussion 30–37

BERGER, JAMES AND BERLINER, L. MARK. Robust Bayes and empirical Bayes analysis with ε-contaminated priors 461–486

BERLINER, L. MARK AND BERGER, JAMES. Robust Bayes and empirical Bayes analysis with ε-contaminated priors 461–486

BHANSALI, R. J. Asymptotically efficient selection of the order by the criterion autoregressive transfer function 315–325

BHATTACHARYYA, B. B. AND RICHARDSON, G. D. Consistent estimators in nonlinear regression for a noncompact parameter space 1591–1596

BICKEL, P. J., GÖTZE, F. AND VAN ZWET, W. R. The Edgeworth expansion for *U*-statistics of degree two 1463–1484

BRILLINGER, DAVID R. Discussion 819–822

CARLSTEIN, EDWARD. The use of subseries values for estimating the variance of a general statistic from a stationary sequence . 1171–1179

CARROLL, RAYMOND J. AND RUPPERT, DAVID. Discussion 1298–1301
